Intrepid **RESPONSE** for FirstNet®

Venue & Event Safety

Whether you're managing events at parks, stadiums, convention centers, or the local fairgrounds, there is always the need for event security, crowd control and medical emergency responses. Keeping your employees, patrons, and infrastructure safe is the top priority for your security and emergency response teams.

Response for FirstNet has the proven capabilities to help you successfully navigate these safety challenges, while automating processes and providing supervisors greater awareness and management of ground staff on site.

Quickly Activate Responders

Send persistent notifications and share critical data to coordinate an effective response to any situation.

Communicate, Collaborate, and Coordinate with Intrepid Response

Intrepid Response is a low-cost, simple-to-use web and mobile software solution that creates a unified operational view for practitioners and management. The solution instantly shares critical information with the entire team using an emergency notification and mobilization tool, a multi-media, information sharing collaboration space, and a Google map with event management contextualized location data.

Share live locations and breadcrumb tracking of multiple event teams over a unified operational view

Efficiently manage and share event security and safety plans

Automate task management, operating procedures, and event checklists

Rapidly control and secure event security, as well as perimeters

Quickly enable requests for additional security for spontaneous crowd control needs

Monitor rowdy fans and intoxicated guests and share information in real-time to prevent incidents

Communicate directly with Law Enforcement, Fire, and EMS teams on site while remaining focused on frontline response to emergencies

Intrepid **NETWORKS**®
